

Do things the easy way with DPA II

A powerful yet simple interactive whiteboard for every teacher or presenter.

Easy as 1-2-3

The DPA II is an advanced digital interactive whiteboard that creates a large interactive projection screen when connected to a PC and data projector. The teacher or presenter controls the computer environment by touching the board surface with the electronic Multimedia Pen. All program functions are transferred to the pen, enabling the presenter to stay in front of the audience while running software programs.

The DPA II is unique because it provides the most important features that teachers and presenters use everyday in a simple easy-to-use format. Annotate, Spotlight and Reveal Presentation Tools are available by touching the predefined Icons with the Multimedia Pen. Virtual WhiteBoard software brings discussions alive by making sure the audience "gets the picture" by creating drawings or taking notes. DPA II is easy to set up and use, so you are ready to give a lesson or presentation in minutes.

The Digital Presentation Appliance II, DPA II, was designed for the average Windows-user who wants to benefit from interactive presentation technology quickly, without the hours of learning and preparation time that is associated with other interactive presentation systems. And, software upgrades are available to achieve more feature-rich interactive presentations.

Digital Presentation Appliance II™

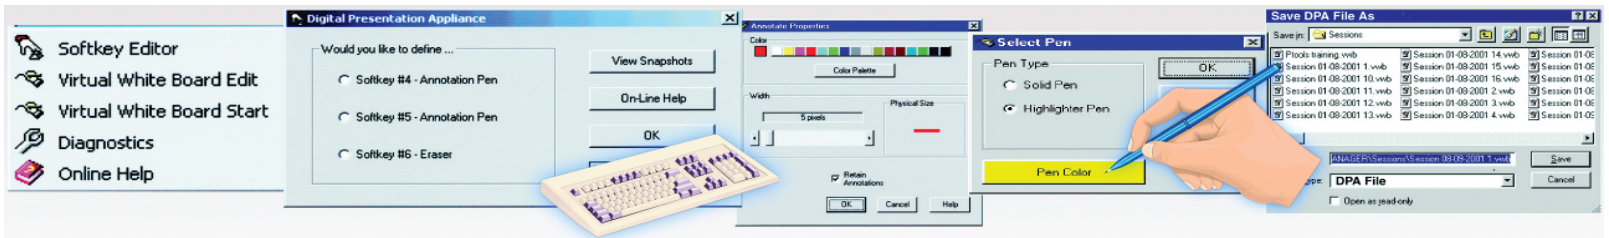

As simple as chalk and a blackboard only much better.

The DPA II Product Features:

- 14 predefined Icons with dynamic Presentation Tools and functions.
- Simple method for modifying the color & size of the Annotation Pens and the width of the Eraser.
- Intuitive screen capture, viewing and retrieval method.
- Virtual WhiteBoard (VWB) to capture and retrieve written ideas in color.
- Online Help menu.
- Fast digital computer interface.
- Multimedia Pen with choice of disposable battery size.
- The first adjustable wall mount and mobile stand bracket, making height adjustments quick and easy.
- Flexible electronics featuring both onboard USB and RS-232 connectivity.
- Software upgrades for advanced users and power presenters.
- Durable, hard Formica surface.
- Special matte finish for great IQ-Image Quality.
- Free web-based instructor-led training.
